PRESS RELEASE

Mumbai, 7 Sept 2015

Tata Consulting Engineers geared to serve as solutions partners to co-create value in Africa

Tata Consulting Engineers Limited (TCE), is an integrated engineering consultant, providing engineering solutions to clients in over 55 countries. The company has a presence in Africa since a decade, partnering with local industries, international MNCs, Engineering Procurement Contractors among others to provide complex engineering services in key sectors such as Power, Infrastructure, Steel Metals & Mining, Chemical and allied industries. TCE is presently involved in about 100 live projects worldwide. Current assignments in Africa is about USD 10 billion worth of projects under management across the African continent.

TCE's engagement in Africa

With engineering expertise garnered from about 53 years of consulting services since 1962, TCE has contributed to the growth story in India and overseas through unique and innovative solutions. This came about through concept to commissioning services for projects of national importance in Power, Infrastructure, Water & Waste Management, Space & Communications, Transport & Smart cities to name a few. Several of these projects were funded by international funding agencies such as World Bank, Asian Development, Japan International Cooperation Agency and other Government/quasi government funded development projects. The expertise in working in tandem with international standards and regulations and management of complex engineering projects is a pre-requisite to any developing nation, which TCE has acquired over the past decades.

Today, as Africa stands on the threshold of tremendous growth potential with human and natural resources on hand, TCE looks forward to share best practices as a solutions partner in order to co-create wealth & progress in Africa. India & Africa share several commonalities in terms of ecosystems, cultural similarities, diversity and similar stages of growth. Tata Consulting Engineers' participation in Africa's growth has been steadily increasing through its partnership with large African and international companies to jointly bring about progress in Africa. The projects that TCE helped commission have impacted the lives of the African people in many ways. The hydro power project in Buseruka, Uganda that lit up the lives of over 1000 households, benefitted communities, schools & hospitals; enhanced power supply through the Komati power plant in South Africa, working with Eskom for uninterrupted power supply through outage management services in South Africa, power solutions in Zambia - have helped to fuel growth in the region. Engineering solutions in mineral enhancement such as coal, zinc and iron have helped to optimize Africa's natural resources and channelize them to profitable local production. Low cost solutions in Greenfield and brownfield asset building and management, steel plants and utilities, have ensured profitability and employment opportunities and knowledge sharing.

Collaborating for creating wealth

TCE's success in Africa stems from the company's innovative solutions delivered in a low cost operating model. TCE understands, clearly, the aspirations and constraints of countries in the development mode and their unique priorities for deriving value for money spent and creating a better social order. Combining Africa's natural resources and the presence of large business entities, the opportunities available are in the area of engineering solutions for ensuring environment-friendly growth, compliance to standards and regulations posed by international funding agencies in Africa, safety management and digital engineering. TCE has created several unique delivery models based on regional and client specific requirements. Collaborating with local entities, TCE looks forward to creating a unique service model that can synergize TCE's engineering capabilities with Africa's ecosystems for knowledge exchange, innovation, local integration and building engineering project management expertise in Africa.

"Synergy through collaboration is the key to creating wealth. Africa and its economy pose a huge opportunity to the rest of the world. We look forward to building on our existing relationship for exchanging knowledge and local integration to create value that is beneficial to the African people and the Tata family," said Mr. J P Haran, Managing Director, Tata Consulting Engineers Ltd.

TCE as a part of the Tata Group, comes with high levels of ethics and integrity. The company's complete focus on sustainable solutions, safety as a fundamental practice in project management and high levels of integrity are some of the foundations that have helped it to build the business. With the economies of India & Africa poised to serve as key focus areas to drive growth across the world, TCE looks forward to partner with African entities to help create a new economic order in the region.

About Tata Consulting Engineers Limited

www.tce.co.in

Tata Consulting Engineers Limited (TCE) is an integrated engineering consulting service provider that has helped commission several prestigious projects over the past five decades. TCE provides concept to commissioning services in key sectors. TCE has to date completed over 7,500 prestigious assignments in over 55 countries, some of which have been a first of its kind. TATA Consulting Engineers Limited is a wholly-owned subsidiary of TATA Sons Ltd. The company has established a good presence pan-India, Middle East, Africa, Europe & USA. TATA Consulting Engineers' African presence covers services in Outage management, EPCM, PMC and Construction management. TATA Consulting Engineers Limited has delivered projects for almost a decade in the regions of Algeria, Benin, Botswana, Ethiopia, Ghana, Liberia, Mozambique, Uganda, Nigeria, South Africa and Zambia.

TCE offers the full range of engineering consultancy services in key industry sectors:

Energy

- Power
Generation (Fossil Fuel Fired, Hydro and Renewable), Transmission and Distribution

- Nuclear energy
Fuel fabrication, Spent fuel processing, Waste management
Special Projects

Process

- Chemical
Oil and gas, Petrochemicals & Refineries, Food and pharmaceuticals, Chemicals- speciality, agro chemicals & Paints, Paper and pulp, Cement, Fertilisers
- Steel, Metal & Mining
Ferrous and non-ferrous metals, Geology and mining, geo-modelling and mine planning Beneficiation, Material handling

Infrastructure

- Water - Water management, waste management, sewerage systems
- Urban development and planning,
- Buildings,
- Environment and ecology,
- Transportation-Metro, Airports and Marine Ports and harbours,
- Manufacturing facilities
- Smart cities

Services

Procurement Management, Design & Engineering, Project Management, Construction Management Services, Safety Services & Advanced Technologies and Simulation, Outage management, Asset Management, Overhaul & Modernisation.
