

Tata Innovista Award 2014

Tata Consulting Engineers' landmark innovation in Flue Gas Desulphurisation (FGD) systems in thermal power plants qualifies for the Tata Innovista 2014 award

Promising Innovation - Core Process at Tata Innovista 2014

Tata Consulting Engineers was honoured at the Tata Innovista 2014 for a promising innovation in core process for its new approach to sea water-based Flue Gas Desulphurisation (FGD) systems in thermal power plants. This process innovation is a first of its kind in sea-water-based FGD systems which helped reduce its client's carbon footprint while achieving overall cost benefit.

Tata Consulting Engineers contended with other Group companies such as Tata Steel, Jaguar Land Rover, Tata Chemicals, TCS, etc. The TCE team that contributed to this innovation comprised of:

Anjan Bhattacharya- The Mentor & Inventor
AK Chaudhary- Team Leader & Inventor, Project Manager
Surendra Naidu- Project Team Lead Process
Getzy L Cathrine- Team Member- Civil designs-Hydraulics
Sankarsubramaniam S- Team Member- Instrumentations&Control
Ms Greeshma V- Team Member- Electrical Engineer.

There were total of 1750 entries (in all categories of innovations) received from across the group companies worldwide for Tata Innovista-2014. Of these 83 entries reached the grand finale on 23rd April at Mumbai and 15 selected for the coveted award. It is indeed a matter of pride that Tata Consulting Engineers received the award for Promising Innovation – Core Process. The team received the award on Wednesday 23rd April 2014 at the Taj Mahal Hotel from the Group Chairman Mr Cyrus Mistry
