

## Atul Choudhari

Chief Technology Officer  
**Tata Consulting Engineers Limited**

### EDUCATION

B. E. Chemical Engineering

### DOMAIN KNOWLEDGE

1. Design & Engineering
2. Energy Transition Technologies
3. Refining and Petrochemicals Technologies
4. Innovation
5. Knowledge Management
6. Value Engineering

### SOCIAL

[www.linkedin.com/in/atul-choudhari-27a5661a](http://www.linkedin.com/in/atul-choudhari-27a5661a)

- Member of American Chemical Society.
- Member of American Institute of Chemical Engineers.

### PERSONAL

In his free time, Atul enjoys reading Marathi literature. He is also a music student plays 'Tabla'

With more than 28 years of experience, Atul Choudhari is the Chief Technology Officer at Tata Consulting Engineers Limited (TCE), a wholly-owned subsidiary of Tata Sons Ltd. TCE offers a wide range of multi-disciplinary design & engineering services and Project Management across several sectors.

Atul joined TCE in 2017 and served as Process and Technology Head based in Mumbai. Besides leading the teams as a Process Supervisor, his experience includes maintaining and developing knowledge management systems, quality control and quality assurance systems. He is actively involved in technology selection and evaluation assignments.

Before joining TCE, Atul served Aker Solutions for more than two decades and was involved in several projects, including process simulations and basic and detailed engineering in petroleum refining and petrochemicals.

Atul has contributed several technical papers addressing various issues related to process design engineering both in national & international journals and conferences. He is actively involved with academia by developing curricula and mentoring undergraduate chemical engineers in various colleges. He is also involved in developing industry-academia partnerships and collaborating on strategic R&D technology programs with premier academic institutions. His areas of interest include new emerging energy markets and alternate fuels, including green hydrogen and LNG.

In a carrier spread over 28 years in core engineering activities, including executing complex projects, Atul is a trusted advisor and expert in process engineering. Passionate about emerging technologies, he has played a significant role in driving 'Energy Transition' technologies at TCE. Atul has also contributed to developing value addition and innovation culture in TCE.
